

SQL App will contain Information about the ETL Process in WorkFlow and Workflow Tasks Tables. Workflow Table will be mapped at Control Package Level for each ETL Solution Tasks Table will be Linked at Task Package Level in ETL Solution .Extract Limits Table will have Task Level Extract boundaries from Source feed.

It Contains Details like  
Workflow Id  
Execution Status  
Package Path  
Execution Order

Some Assumptions are Made in this Framework

--Source Copy of Data is never Deleted / Overwritten.

--Staging Area will have cumulative snapshot of Source data even if the records are duplicated (They are flagged as per Snapshot version)
